Deloitte

Job canvas – Cyber

lob summary

As a Graduate in Deloitte's Cyber, Privacy and Resilience Team, you'll be playing an instrumental role in safeguarding our client's information systems, optimising data privacy, and bolstering business resilience.

Responsibilities

- Assist in developing and implementing robust cybers ecurity solutions for our clients across diverse sectors.
- Support clients to navigate through Security Incidents, identify the cause and provide next steps to mitigating future incidents.
- Work alongside experienced professionals in conducting risk assessments, identifying vulnerabilities, and suggesting prevention techniques.
- Aid in formulating and upholding security and privacy protocols/policies throughout client's organisations.
- Collaborate with clients to develop business continuity and disaster recovery plans to assure business resilience and continuity even in the face of potential threats.

Team

Cyber, Privacy and Resilience is a specialist team that comprises of almost 40 Cyber Security professionals nationwide and sits within Deloitte's Risk Advisory service line that consists of over 150 professionals.

Our team delivers services across three key pillars: Strategy & Governance, Implement & Operate, and Detect & Respond.

We are led by four Partners: Anu Nayar, Joanne Lu, Faris Azimullah and Tony Arnold.

How we invest in you

- An initial 90-day induction plan to learn about the business and clients, along with ongoing support and mentorship
- Personalised Buddy and Coach to show you the ropes and guide your career
- Deloitte pay for ongoing education/study days. Common certifications include Cloud Security certifications (AWS, Azure etc), SANS, Identity Management tools and more

Project overview

Week 3-5

Collaborating as a team, you will engage in consultations with the client to gain an understanding of their challenges and subsequently, devise a strategy to address their issue.

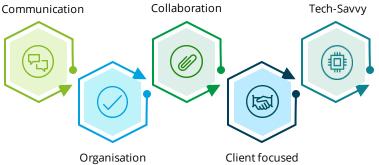

As part of executing the plan, you will contribute towards constructing a solution tailored specifically to resolve the client's problems, with the aim of enhancing their capability.

Together with the team, you'll finalise the project, **Final Stages** gathering remaining information from the client. Moreover, you'll undertake several iterations of review

to ensure optimal outcomes. The final deliverable is then presented to the client. Following this, the team takes time to reflect on th project, a cknowledging their successes and pinpoi
